

High-Efficiency Clothes Washer Rebate Program for Multi-Family Residential Properties

Rebate Incentives for Improving Water Efficiency

High Efficiency Clothes Washers - HEW

Water Factor of 4.0 or less

in unit installation only

If your washing machines are more than 5 years old, you are paying too much on your utility bills. By installing a new, High Efficiency Washer (HEW), you can reduce your energy and water costs up to 50%. These state-of-the-art washing machines help minimize drying time by extracting more water from the clothes during the spin cycle and are more efficient than traditional machines. HEWs which have a water factor of 4.0 or less qualify for this program.

Water Factor = Number of gallons needed for each cubic foot of laundry. A lower number indicates lower consumption and more efficient use of water.

KEY

Symbols: An asterisk(*), plus sign (+), or pound sign (#) indicate that one or more coding variables may be used in place of the symbol to indicate a color or feature that does not affect water efficiency.

HIGH EFFICIENCY CLOTHES WASHERS - HEW

The following HEWs with a water factor of 4.0 or less qualify for rebate
