Rotating Nozzles for Pop-Up Spray Head Retrofits

Page 1 of 2

Metropolitan recognizes that Pop-up spray heads with multi-stream, multi-trajectory rotating nozzles represent a new alternative to the irrigation of landscapes. These new nozzles improve water distribution by about 23 percent on average and reduce irrigation run times by about 22 percent, resulting in water savings. Metropolitan’s incentives are available for both retrofit and new construction in both multi-family residential and commercial sectors.

The following sprinkler nozzles (including earlier models) currently qualify for rebates:
